

Innovative Teaching and Learning

Aims and Scope

The *Innovative Teaching and Learning* (ITL) is a scholarly journal founded by the BNU-HKBU United International College. This journal aims to promote college teaching and learning through empirical and review studies, as well as teaching practices. A quality education is powered by excellence in teaching and learning. As the first liberal arts college in the Chinese mainland, BNU-HKBU United International College (UIC) has always set its top priority on fostering brilliant students by tapping into many innovative teaching concepts and practices. We are proud to have produced some shareworthy results in the journal *Innovative Teaching and Learning* which is founded in 2019.

Manuscript Submission

To speed up the refereeing and publication processes, all transactions and communications between the journal and the authors will be carried out electronically. All received submissions will be acknowledged.

All manuscripts should be in PDF files. Papers should be submitted online. See <https://www.global-sci.org/itl> for more information.

The publisher advises the author(s) to retain the source files until the publication process is completed. The source files will be required as soon as the submitted papers are accepted for publications.

Submission Policy and Copyright

Submission of a manuscript implies that the paper is original and has not been submitted elsewhere. It is required that authors provide a Transfer of Copyright to the Publisher. The signed Consent to Publish gives the Publisher the Author(s)' permission to publish the Work. The signed Transfer of Copyright empowers the Publisher on behalf of the Author(s) to protect the Work and its images against any unauthorized use, and to properly authorize dissemination of the Work. The editors will supply the necessary forms for this transfer.

Proofs

Authors will receive one set of proofs for correction. No alterations or corrections beyond corrections on minor typographic errors will normally be accepted once the set of proofs is issued.

TeX File Preparation

The template files will assist authors in preparing the LaTeX version of your final document. On line information can be found in the journal's website. Contact the journal's office at info@global-sci.org if you have any questions.
